Notice: November 1, 2016: We are aware of the Colonial Pipeline explosion in Alabama that occurred on October 31st that could cause supply issues for the southeast and entire east coast. Until product inventories return to normal, end users should provide our contractors as much lead time as they can for orders and expect delivery delays. Please inform MMO of any significant issues concerning delivery or other inability to perform. We will continue to monitor the situation and update as needed.

Note: In order to start the delivery clock, a written PO must be issued to the vendor.

02/10/2014 NOTICE:

It is anticipated that there will be another natural gas curtailment this week due to the extreme cold. The last curtailment increased demand for other fuels like diesel (especially off road diesel) and propane. This created shortages for same. Terminals supplied by pipeline (like North Augusta) were impacted the most. It is highly recommended that contract users assess their fuel needs for this week and notify our contractors of same by close-of-business today (Monday 02/10). As stated in the previous notice, we expect our contractors to perform per the terms and conditions of the contract. We appreciate our contract users giving consideration to unusual market conditions and working with our contractors by being as flexible as their operations will allow regarding delivery.

01/30/2014 NOTICE:

As many of you are probably aware, the extreme cold through much of the country has surged demand for all types of heating fuels. The propane shortages appear to be increasing the pressure on diesel supplies in the South East, especially at terminals supplied via pipeline. As of the date of this notice, 01/30/2014, this office has not agreed to any changes in our fuel contracts. This includes pricing and delivery terms. Should a contractor refuse to perform per the terms of the contract, contract users should document the contractor's refusal to perform, source their fuel elsewhere, track their damages (difference between the new source's price and the statewide term contract price), and submit same to this office.

Given the diesel supply problem has been verified, we encourage our contract users to be as flexible as their operations will permit regarding delivery times (contract term is 48 hours ARO). Would seem reasonable to afford the contractors a little more time when we can. However, until posted otherwise, contract users should only be charged the contract price. There should be no additional charges to include freight/transportation.

STATEWIDE CONTRACTS FOR BULK DELIVERIES OF ULTRA LOW-SULFUR DIESEL (ULSD), AND BIODIESEL (B5 & B20)

To: All Diesel Fuel Contract Users

Updated Status: The new contracts for tank wagon loads of ULSD and B5 have an effective start date of August 17, 2012. **All fuel contracts (all fuel and load types) are now structured with a 4 zone pricing structure.**

NOTE: It is our understanding that the market for ULSD is mirroring that of clear unleaded. If our information is correct, we can expect to experience a gradual shift in availability at the terminals from ULSD to B5 or higher blends much like what we experienced with clear unleaded and E-10. Our respective organizations' green initiatives combined with a reduced availability of ULSD will likely provide the stimulus needed to transition to blended diesel fuels. Recommend contract users consider taking action in the near term to transition from ULSD to B5 or higher blended fuels.

Questions regarding this notice should be addressed to Rob Malpass (phone: 803-737-5769, e-mail Remalpass@mmo.sc.gov).
